

Referencing & bibliographies

Contents:

- Finding literature.
- Citations and references.
- Annotated bibliographies vs literature surveys.
- Reference & citation styles & components.
- Reference management software.

What are academic sources?

- Academic sources:
 - By trained academics.
 - Peer reviewed.
 - Scholarly format.

Non-academic sources	Academic sources
Blog entry, web page	Conference article
Lecture slides online	Chapter in book
Informal magazine articles	Journal article
Wikipedia	Thesis/dissertation
Mum	Technical report

Referencing & bibliographies

Contents:

- Finding literature.
- Citations and references.
- Annotated bibliographies vs literature surveys.
- Reference & citation styles & components.
- Reference management software.

Citations and references

Citation: *A mention in the text of a source.*

Due to the importance of context, there is increasing awareness of the importance of embedding ethics awareness into each topic [1].

Reference: *Full information about where to find source.*

[1]A. Narayanan and S. Vallor, “Why software engineering courses should include ethics coverage,” Communications of the ACM, vol. 57, no. 3, pp. 23–25, Mar. 2014.

Annotated bibliographies vs literature reviews

BLG374E
Tech.
Comm.
Eng.

Document:	Annotated Bibliography	Literature Review
Stage:	During survey.	During analysis.
Purpose:	For organising sources during survey.	For analysing sources and building up a picture.
Format:	A list of references and notes.	Prose text elaborating analysis.

Example annotated bibliography snippet

RASKIN, J. 1997. Looking for a humane interface: Will computers ever become easy to use? Communications of the ACM, 40, 2, 98-101.

Argues that users need to be able to work without needing to know the current system state; allowing automatic functioning with reusable components. Recommends "cognetics" – experimental ergonomics for user interface design, new

Example literature review snippet

Raskin [1997] attempts to use the modern GUI as a springboard to understanding how to best build on current advances in user interfaces. He proposes an experimental methodology, akin to ergonomics and cognitive psychology. In the context of video editing, this methodology is rarely applied, as Malcom [2005] argues, due to the fact that the underlying technology is in flux. However, several studies [Cox 2003; Higgins 2010; Milne and Milne, 2014] have shown that

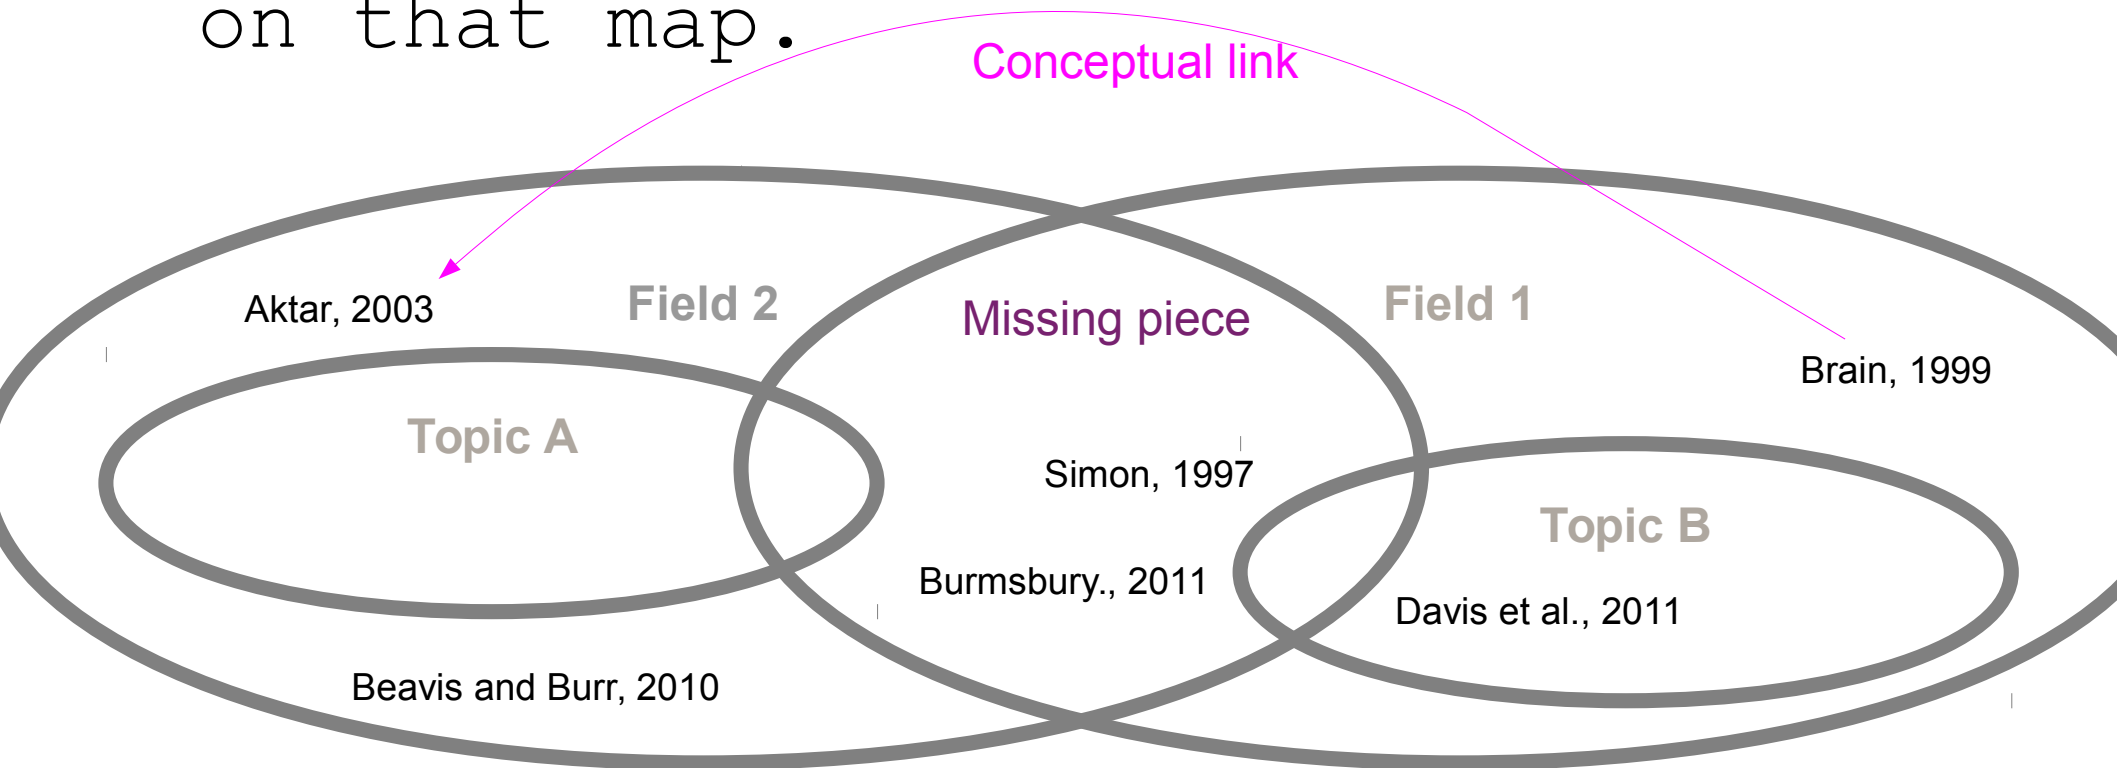

Literature surveys require analysis

They ask questions like:

- What is left to do in this area?
- What are the most important things done?
- What are the key distinctions and ideas made?
- What are the key technologies and how are they different/similar?
- Who are the key people and what have they done?

Literature surveys require analysis

Literature surveys make a map and place the current research on that map.

Referencing & bibliographies

Contents:

- Finding literature.
- Citations and references.
- Annotated bibliographies vs literature surveys.
- Reference & citation styles & components.
- Reference management software.

Reference and citation styles: ACM

- ACM uses a Harvard-style (author-date) citation/referencing format:

Due to this feature the eyes must actively move in order to obtain detailed views of different parts of the scene [Steinman 2003].

...

S TEINMAN, R. 2003. Gaze control under natural conditions. In The Visual Neurosciences, L. Chalupa and J. Werner, Eds. MIT Press, 1339–1356.

- From <http://dl.acm.org/citation.cfm?id=2536767>
- See <http://www.acm.org/publications/submissions>.

Reference and citation styles: IEEE Transactions

- IEEE is a Vancouver-style (number-based) citation/referencing format:

There has been some work on using dynamics models of people while tracking them [1,2]; it remains unclear however as to whether the physical models can provide an...

....

[2] M. Vondrak, L. Sigal, and O. C. Jenkins, “Physical simulation for probabilistic motion tracking,” in Proc. IEEE Computer Society Conf. on Computer Vision and Pattern Recognition (CVPR). Los Alamitos, CA, USA: IEEE Computer Society, 2008, pp. 1–8.

- See https://www.ieee.org/publications_standards/publications/authors/author_templates.html

Exercise: what information is necessary for the following references?

- A blog entry?
- Your textbook.
- A chapter from a compilation book?
- My PhD thesis.
- The conference paper that came from your undergraduate thesis?
- A news article from hurriyet.com.tr?
- Printed lecture notes.

1. Click import symbol.

The screenshot shows the IEEE Xplore Digital Library interface. The browser address bar displays the URL: `ieeexplore.ieee.org/xpl/articleDetails.jsp?tp=&arnumber=1024068&queryText%3Dvideo+editing+learnat`. In the top right corner of the page, there is a red circle highlighting three icons: a document icon, a magnifying glass icon, and a star icon. Below the browser bar, the IEEE Xplore logo is visible on the left, and the IEEE logo is on the right. A banner in the center states: "Access provided by: ULAKBIM UASL ISTANBUL TEKNIK UNIV" with a "Sign Out" link. The main content area shows the article title "Generation, visualization, and editing of 3D video" and a button labeled "Full Text as PDF". At the bottom, the author information is listed as "2 Author(s): Matsuyama, T. ; Graduate Sch. of Informatics, Kyoto Univ., Japan ; Takai, T."

Generation, visualization, and editing of 3D video

 Full Text as PDF

2
Author(s)

Matsuyama, T. ; Graduate Sch. of Informatics, Kyoto Univ., Japan ; Takai, T.

3D **video** is the ultimate image medium recording dynamic visual events in the real world as is. Recorded object behaviors can be observed from any viewpoint, because 3D **video** records the object's full 3D

Zotero example: Insert reference list into word processor

Human interface design is a solved problem [1], [2].

Reference List

- [1] D. J. Duff, J. Wyatt, and R. Stolkin, “Motion Estimation Using Physical Simulation,” in *Proceedings of the IEEE International Conference on Robotics and Automation*, Anchorage, AL, USA, 2010, pp. 1511–1517.
- [2] T. Matsuyama and T. Takai, “Generation, visualization, and editing of 3D video,” in *First International Symposium on 3D Data Processing Visualization and Transmission*, 2002. *Proceedings*, Padova, Italy, 2002, pp. 234–245.

How to install Zotero

Download Zotero:

<https://www.zotero.org/download/>

Download browser plugin:

<https://www.zotero.org/download/>

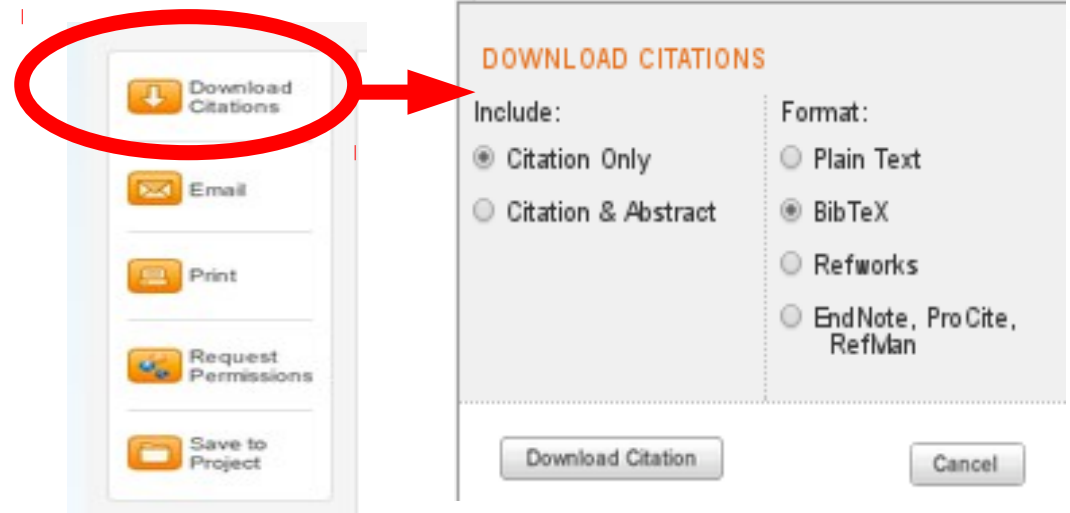

(scroll down to link for your browser).

Download word-processor plugin:

http://www.zotero.org/support/word_processor_integration

Latex/Bibtex example: Bibtex file

BLG374E
Tech.
Comm.
Eng.

In Mybib.bib:

```
@inproceedings{duff_motion_2010,  
  year = {2010},  
  pages = {1511--1517},  
  address = {Anchorage, {AL}, {USA}},  
  url = {http://eprints.bham.ac.uk/977/},  
  title = {Motion Estimation Using Physical Simulation},  
  doi = {doi:10.1109/ROBOT.2010.5509590},  
  booktitle = {Proceedings of the {IEEE} International Conference on  
Robotics and Automation},  
  author = {Duff, Damien Jade and Wyatt, Jeremy and Stolkin, Rustam},  
},
```

```
@inproceedings{matsuyama_generation_2002,  
  address = {Padova, Italy},  
  title = {Generation, visualization, and editing of {3D} video},  
  doi = {10.1109/TDPVT.2002.1024068},  
  booktitle = {First International Symposium on {3D} Data Processing  
Visualization and Transmission, 2002. Proceedings},
```

Latex/Bibtex example: Bibtex file

BLG374E
Tech.
Comm.
Eng.

In mytex.tex:

```
\documentclass{article}  
\begin{document}  
\bibliographystyle{ieeetr}%Choose a bibliographic style
```

```
Human interface design is a solved problem  
\cite{duff_motion_2010,matsuyama_generation_2002}.
```

```
\bibliography{mybib}  
\end{document}
```

Commands to run:

- (1) `pdflatex mytex.tex`
- (2) `bibtex mytex`
- (3) `pdflatex mytex.tex`

Human interface design is a solved problem[1, 2].
